# Angular heads

## Angular heads for special applications

Upon specific customer's request our company supplies the spindle series  PS-A with the angular heads type  TSA. The regulation of the angular movement on the several axis is obtained by graduated angular scale, with the locking done manually. The angular heads can be supplied with machine tool attachment ISO/BT 40-50 or  HSK-A/E-40/63/80/100.
